

AI Use Quick Check

A simple 10-minute check to see if your AI use would stand up to scrutiny.

1 DATA

- ☐ Do you know what data is being entered into AI tools?
- ☐ Would you be comfortable explaining that to a client?

2 OWNERSHIP

- ☐ Who is responsible for AI-generated outputs?
- ☐ Are they being reviewed consistently?

3 USE

- ☐ Where is AI being used in your workflows?
- ☐ Is it consistent across the team?

4 REALITY CHECK

- ☐ Could you explain your AI use to a client if they asked?
- ☐ Would your answer be the same across your team?

If you hesitated on any of these, you're not alone.

Most teams are already using AI — just without structure.
